

## Boosting Your Love Of Life

### Our Pilot Projects

A diagnosis of cancer often brings with it feelings of helplessness and fear. These states of mind can both complicate and hinder convalescence. The UNIFONTIS approach embraces the following pilot projects: dolphin therapy, hippo therapy and a pilgrimage on the Camino de Santiago. The aim with each project is to ascertain whether the same well-documented positive results can be achieved with tumor patients with a view to promoting the effectiveness of any subsequent tumor therapy.

## Your Contact

"Our focus is on the person not the illness. We provide answers to questions. We take joint decisions. We support you. Let us work together to enhance your joy of life – and focus attention on your health again."

Kind regards Prof. Dr. Joachim Dreves

Clinic For Integrative Oncology

## About Us

### A Warm Welcome To UNIFONTIS From Prof. Joachim Drevs And His Team

As one of the leading international clinics specializing in the treatment of cancer and tumor sufferers, UNIFONTIS provides innovative scientific and medical facilities of the highest quality. And what is unique in our approach: we focus on the patient – on the person.

The doctor and his team are here for YOU – to ensure you get the time you deserve. He will work with and on your behalf to find the best way to treat your tumor giving you comprehensible and detailed advice. No matter whether the most suitable form of treatment comes from the field of orthodox medicine, homeopathy or psychotherapy.

We remain at your side. Even during consultations with other doctors. In partnership. Until hopefully your health is restored.

## Our Therapy Program

UNIFONTIS' central therapeutic approach is based on salutogenesis, which emphasizes the strengthening of health. For gaining health and to optimally assist our patients in their fight against cancer, UNIFONTIS pursues two mutually complementary therapy approaches:

### Innovative Therapies

Owing to the affiliation with Tübingen University Hospital, UNIFONTIS is always at the cutting edge of teaching and research. Our many years of experience in the development and testing of medicines directly benefit our patients.

### Integrative Therapies

Integrating different methods, the therapeutic approach considers the person as a whole – body, mind and soul – and includes conventional and naturopathic therapy forms as well as psychological care.

## Our Team

In bright, friendly treatment rooms on Level 9 of the health center, our 16-member team headed by Prof. Dr. Drevs is available to you for diagnoses as well as personal treatment and therapies. Doctors, therapists, alternative medicine practitioners and nursing staff work hand in hand in order to provide you individual and comprehensive counseling in the spirit of our integrative treatment approach.

Further medical services and general services provided by the health center of Tübingen University Hospital complement the services locally offered by our practice. Immediate follow-up treatment, rehabilitation therapies and also active preventive treatment thus are available in close proximity.

The UNIFONTIS clinic team will be happy to provide you information and answer any questions you may have.
